Do you want to cure aging by snorting some fun stuff, or at least increase your intelligence to use your time more efficiently in order to fulfill this time-racing loop?

[>>14549912](#)

True true. Steamy hot pile of shit.

>inb4 not related

4chanstats says /sci/ has a posting rate of 3.1 posts per minute. It's 62496 posts away. Pax said he'd been posting here for at least two weeks, and I believe I've seen the original thread.

Now I'll just find it on archive. Perhaps it's not the very first post of his, but it's better than nothing. Still have to look several tens of thousands posts down the line. Not without a margin of error, still. Can't assume posting rate is linear. However, it can be regressed to the mean value. Sneed oil and jetstream ice-cream.

We are trying to understand the potential issue with fungal infections at this moment.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7232281/>
people with compromised immune systems and diabetes are at higher risks of these complications from intranasal DFO and we don't even have people other than me that have begun using it.

<https://pubmed.ncbi.nlm.nih.gov/284067/>

My nasal tissue has been sloughing off more with water+DFO than insulin and intranasal insulin may be protective because it reduces neuronal hyperglycemia. The rapamycin id snorted was an intervention to introduce rapamycin to my brain and I'd been using cbd to support increasing rapamycin levels in my brain.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7924206/>

<https://pubmed.ncbi.nlm.nih.gov/31924480/>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3294450/>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC288195/>

The intranasal ROA is important for all of these interventions and I've only been testing it on myself. One of you can die if you don't know what you're doing and please don't replicate what I do and get yourselves hurt. I've had arguments with close associates because this development of my research running away from me is personally distressing for the idea that one of you can die. We can help end the pandemic with intranasal dfo I don't want this to become something that doesn't get off the ground because others are careless.

This whole situation is some bizarre DN roleplay in active time with other fake pax's that I cant control and now im trying to figure how we can get a better grip on the situation so people dont make fungus grow in their brain. This is a short few weeks from potential poison control calls and adverse reaction reports and then we're

all fucked

>> ☐ **Anonymous** Tue Jun 7 02:30:54 2022 No.14550139

Stop watching edgy Japanese cartoons.

1. Use tripcode.
2. Nobody is going to snort DFO just because some random psychopath in his manic phase on 4chan said it cures aging.
3. I am intrigued though. How do I join the community and start learning?

Quoted by: >>14550243

>>14550149

I know that this is you. You are obviously a genius (99.9th percentile) psychopath. Trolls are not capable of mimicking that style, no matter how gifted they are. Given that you are responding to my posts with original messages, you are indeed the OG Pax.

There are very few people who can understand what you are talking about. The chances somebody who knows his shit will see your messages (and your imposters' messages) is extremely low. This is just a meme, it will not elevate further unless you elevate it.

Now, let me into your community. I want to learn.
