^{1/} Prepared from citations found in Index Medicus, published by the National Library of Medicine. Additional references relating to the administration and dosage, biosynthesis, metabolism, and pharmacology of lysergic acid diethylamide also appear in Index Medicus. The cumulated Index Medicus was the source of the 1966 references while the monthly supplements are the basis of the 1967 citations. The 1967 list omits the months of February, November, and December, which were not available for review at the time this listing was prepared. Only English language references are included.
